Mucahit Tasan

Frontend Software Engineer

Frontend Architecture | Product Engineering | Fintech & Insurtech

Diyarbakır, Türkiye | GMT+3 | +90 535 601 2109 | mucahittasan0@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Frontend Software Engineer with 7 years of hands-on software development experience, including 4+ years working professionally in product teams.
Owned and delivered frontend architecture across five production platforms for Volkswagen Doğuş Finans at Doğuş Teknoloji, spanning insurance, fleet management, factoring, corporate services, and credit calculation.
Specialized in React, Next.js, TypeScript, scalable component systems, complex multi-step workflows, server-state management, performance optimization, accessibility, and pixel-accurate implementation from Figma.
Combines strong technical ownership with a product-oriented mindset and cross-functional collaboration throughout the full delivery lifecycle, from requirement analysis and architectural decisions to production release and optimization.

EXPERIENCE

Frontend Software Engineer - Contract

Doğuş Teknoloji - Volkswagen Doğuş Finans **August 2024 - July 2026 | Istanbul, Türkiye**

- Owned and drove frontend development across five Volkswagen Doğuş Finans digital products: VDF Sigorta, VDF Filo, VDF Faktoring, vdf.com.tr, and the KHM credit-calculation platform.
- Designed scalable frontend architecture and reusable component patterns with Next.js, TypeScript, Tailwind CSS, and Storybook, improving consistency and maintainability across multiple corporate products.
- Delivered responsive, accessible, and pixel-accurate user interfaces based on Figma designs while maintaining corporate brand standards across desktop, tablet, and mobile devices.
- Built complex, production-grade customer journeys including OTP verification, personal and vehicle information flows, insurance quote comparison, policy selection, and credit-calculation experiences.
- Designed reliable form and validation architecture using React Hook Form and Zod, supporting conditional fields, multi-step workflows, API validation, error states, and customer onboarding processes.
- Defined state-management and server-data patterns using Zustand and TanStack Query, including caching, stale-time strategies, loading states, request timeouts, retries, and standardized error handling.
- Improved application performance through image optimization, rendering improvements, request standardization, caching strategies, and mobile initial-load optimizations, achieving Lighthouse scores of up to 98 on optimized desktop pages.
- Implemented SEO-critical technical requirements including localized routes, redirects, canonical URLs, dynamic sitemap generation, semantic HTML, and metadata management.
- Integrated frontend applications with REST APIs and .NET microservices, ensuring reliable communication, predictable data contracts, and resilient user experiences.
- Collaborated closely with product managers, business analysts, designers, QA engineers, backend developers, and infrastructure teams from requirement analysis through production release and support.
- Contributed to code reviews, architectural discussions, sprint planning, bug tracking, release management, and CI/CD improvements using Azure DevOps and Azure Boards.

Frontend Software Engineer - Contract

777 Sense Labs **November 2023 - August 2024 | Istanbul, Türkiye**

- Delivered cross-platform web and mobile applications using Next.js, React Native, TypeScript, and modern frontend development practices.
- Translated Figma designs into responsive, reusable, and pixel-accurate interfaces across web and mobile platforms.
- Designed reusable component patterns and application structures to improve consistency, maintainability, and development efficiency.
- Integrated frontend and mobile applications with REST APIs backed by Node.js and MongoDB services.
- Improved application load performance by optimizing component rendering, network requests, assets, and application state.
- Implemented predictable state-management and data-flow patterns for complex user interactions and API-driven screens.
- Integrated Firebase Crashlytics to support mobile error monitoring, debugging, and production stability.
- Collaborated with designers, backend engineers, and product stakeholders to deliver features from initial requirements to production.

Frontend Software Engineer - Part-Time

Educational Network, Inc. **June 2022 - October 2023 | Istanbul, Türkiye**

- Developed responsive educational platforms using React, JavaScript, TypeScript, and modern CSS technologies.
- Built reusable UI components and frontend patterns that reduced duplication and improved consistency across application screens.
- Implemented WCAG 2.1 accessibility practices using semantic HTML, keyboard navigation, accessible form structures, and appropriate ARIA attributes.
- Improved application performance and SEO through rendering optimizations, semantic page structure, optimized assets, and responsive implementation.
- Collaborated with team members to translate product requirements and designs into maintainable frontend features.

Frontend Software Engineer - Contract

Kedi Games **November 2022 - May 2023 | Istanbul, Türkiye**

- Developed interactive gaming interfaces and web experiences using React.js, Three.js, and modern JavaScript.
- Created interactive 3D elements and animations using Three.js and Spline to improve user engagement.
- Built a responsive administration dashboard for managing application and game-related content.
- Implemented real-time application features using WebSocket connections.
- Developed reusable and responsive components for different screen sizes and interaction patterns.

SELECTED PROJECTS

ReleaseProof - Website Release Assurance Platform

github.com/mucahittasan/RelaseProof | July 2026 - Present

- Architected and developed a multi-tenant SaaS platform for web agencies to compare live and staging environments and detect release risks before deployment.
- Implemented authenticated workspace, project, environment, and scan workflows using Supabase Auth, PostgreSQL, Row Level Security, secure RPC contracts, and PGMQ-based queue execution.
- Built an SSRF-protected and resource-bounded website evidence collector with explicit route, concurrency, response-size, aggregate-byte, redirect, and duration limits.
- Developed a modular deterministic scanning engine with 16 checks covering SEO metadata and content changes, redirects and status changes, canonical and noindex issues, broken internal links, GTM/GA tracking, and expected scripts.
- Structured the product as a pnpm and Turborepo monorepo with a Next.js application, Node.js worker, and reusable scanner, checks, collector, domain, and database-contract packages.
- **Tech Stack:** Next.js, TypeScript, Node.js, Supabase, PostgreSQL, PGMQ, Turborepo, pnpm, Vitest, Zod

Craftolio - Portfolio and CV Builder

github.com/mucahittasan/craftolio | October 2025 - Present

- Architected and developed a full-stack SaaS platform that enables developers to create, customize, and publish professional portfolio pages.
- Built authenticated dashboard experiences and multi-step forms for managing profiles, social links, projects, education, work experience, skills, and certifications.
- Designed reusable form architecture using React Hook Form and Zod to support validation, conditional fields, error handling, and consistent user experiences.
- Implemented public user portfolio pages with dynamic routes, server-rendered content, and customizable profile information.
- Designed the application architecture using Next.js App Router, TypeScript, Supabase, PostgreSQL, Prisma, TanStack Query, Zustand, and Tailwind CSS.
- Applied a product-oriented development approach focused on maintainability, usability, performance, and future SaaS monetization.
- **Tech Stack:** Next.js, React, TypeScript, Supabase, PostgreSQL, Prisma, TanStack Query, Zustand, React Hook Form, Zod, Tailwind CSS

EDUCATION

Associate Degree in Computer Programming

Mardin Artuklu University | 2021 - 2023

CORE SKILLS

Core Frontend: TypeScript, JavaScript, React, Next.js, React Native, HTML5, CSS3
Frontend Architecture: Scalable Frontend Architecture, Component Architecture, Design Systems, Reusable Component Libraries, Responsive Design, Pixel-Accurate UI
State, Forms and Data: Zustand, Redux Toolkit, TanStack Query, React Hook Form, Zod, REST API Integration, Server-State Management
Performance and Quality: Core Web Vitals, Lighthouse, Performance Optimization, Accessibility, WCAG 2.1, SEO, Storybook, Jest, React Testing Library, Playwright
Backend and Data: Node.js, Express.js, Supabase, PostgreSQL, Prisma, MongoDB, Strapi
Tools and Delivery: Git, GitHub, Azure DevOps, CI/CD, Docker, Figma, Agile Development

LANGUAGES

Turkish: Native | **English:** Intermediate - B1
